Business Insight

United Kingdom generates the highest revenue and has the largest customer base, contributing the majority of overall business performance.

A small group of top customers contributes a large portion of total revenue, indicating strong customer concentration.

Top-selling products drive most of the quantity sold, but revenue is spread across many products, showing a mixed product performance.

Some marketing campaigns generate high revenue but also have high acquisition costs, impacting overall profitability.

There is no consistent relationship between marketing spend and revenue, suggesting inefficiencies in campaign spending.

Business Advice

Focus more on high-performing markets like the United Kingdom to maximize revenue growth and customer expansion.

Invest in high-return marketing campaigns and reduce spending on low-performing ones to improve overall profitability.

Promote top-selling products and bundle slow-moving items with them to increase overall product sales.
